Developer Report

Acunetix Security Audit

23 August 2017

Scan of http://cimahikota.go.id

Scan details

Scan information	
Start time	23/08/2017, 03:26:23
Start url	http://cimahikota.go.id
Host	http://cimahikota.go.id
Scan time	129 minutes, 34 seconds
Profile	Full Scan

Threat level

Acunetix Threat Level 3

One or more high-severity type vulnerabilities have been discovered by the scanner. A malicious user can exploit these vulnerabilities and compromise the backend database and/or deface your website.

Alerts details

⊘ Cross site scripting vulnerability in Uploadify SWF

Severity	**High**
Reported by module	Scripting (Uploadify_SWF_Audit.script)

Description

Uploadify is a jQuery plugin that integrates a fully-customizable multiple file upload utility on your website. Multiple cross site scripting vulnerabilities were reported in older versions of the Uploadify SWF that may allow an attacker to execute arbitrary Javascript code.

Impact

Malicious users may inject JavaScript, VBScript, ActiveX, HTML or Flash into a vulnerable application to fool a user in order to gather data from them. An attacker can steal the session cookie and take over the account, impersonating the user. It is also possible to modify the content of the page presented to the user.

Recommendation

Upgrade to the latest version of Uploadify.

References

⊘ HTML form without CSRF protection

Severity	**Medium**
Reported by module	Crawler

Description

This alert may be a false positive, manual confirmation is required.

Cross-site request forgery, also known as a one-click attack or session riding and abbreviated as CSRF or XSRF, is a type of malicious exploit of a website whereby unauthorized commands are transmitted from a user that the website trusts.

Acunetix WVS found a HTML form with no apparent CSRF protection implemented. Consult details for more information about the affected HTML form.

Impact

An attacker may force the users of a web application to execute actions of the attacker"s choosing. A successful CSRF exploit can compromise end user data and operation in case of normal user. If the targeted end user is the administrator account, this can compromise the entire web application.

Recommendation

Check if this form requires CSRF protection and implement CSRF countermeasures if necessary.

⚠ Slow HTTP Denial of Service Attack

Severity	**Medium**
Reported by module	Slow_HTTP_DOS

Description

Your web server is vulnerable to Slow HTTP DoS (Denial of Service) attacks.

Slowloris and Slow HTTP POST DoS attacks rely on the fact that the HTTP protocol, by design, requires requests to be completely received by the server before they are processed. If an HTTP request is not complete, or if the transfer rate is very low, the server keeps its resources busy waiting for the rest of the data. If the server keeps too many resources busy, this creates a denial of service.

Impact

A single machine can take down another machine's web server with minimal bandwidth and side effects on unrelated services and ports.

Recommendation

Consult Web references for information about protecting your web server against this type of attack.

⚠ Vulnerable Javascript library

Severity	**Medium**
Reported by module	Scripting (Javascript_Libraries_Audit.script)

Description

You are using a vulnerable Javascript library. One or more vulnerabilities were reported for this version of the Javascript library. Consult Attack details and Web References for more information about the affected library and the vulnerabilities that were reported.

Impact

Consult References for more information.

Recommendation

Upgrade to the latest version.

Affected items

ⓘ Clickjacking: X-Frame-Options header missing

Severity	**Low**
Reported by module	Scripting (Clickjacking_X_Frame_Options.script)

Description

Clickjacking (User Interface redress attack, UI redress attack, UI redressing) is a malicious technique of tricking a Web user into clicking on something different from what the user perceives they are clicking on, thus potentially revealing confidential information or taking control of their computer while clicking on seemingly innocuous web pages.

The server didn't return an **X-Frame-Options** header which means that this website could be at risk of a clickjacking attack. The X-Frame-Options HTTP response header can be used to indicate whether or not a browser should be allowed to render a page inside a frame or iframe. Sites can use this to avoid clickjacking attacks, by ensuring that their content is not embedded into other sites.

Impact

The impact depends on the affected web application.

Recommendation

Configure your web server to include an X-Frame-Options header. Consult Web references for more information about the possible values for this header.

ⓘ Cookie(s) without HttpOnly flag set

Severity	**Low**
Reported by module	Crawler

Description

This cookie does not have the HTTPOnly flag set. When a cookie is set with the HTTPOnly flag, it instructs the browser that the cookie can only be accessed by the server and not by client-side scripts. This is an important security protection for session cookies.

Impact

None

Recommendation

If possible, you should set the HTTPOnly flag for this cookie.

Affected items

Web Server	
Details	
This feature is not available in trial version.	
Request headers	
`This feature is not available in trial version.`	

ⓘ Documentation file

Severity	**Low**
Reported by module	Scripting (Readme_Files.script)

Description

A documentation file (e.g. readme.txt, changelog.txt, ...) was found in this directory. The information contained in these files could help an attacker identify the web application you are using and sometimes the version of the application. It's recommended to remove these files from production systems.

Impact

These files may disclose sensitive information. This information can be used to launch further attacks.

Recommendation

Remove or restrict access to all documentation file acessible from internet.

Affected items

/license.txt	
Details	

This feature is not available in trial version.

Request headers
`This feature is not available in trial version.`

⊙ Possible sensitive directories

Severity	**Low**
Reported by module	Scripting (Possible_Sensitive_Directories.script)

Description

A possible sensitive directory has been found. This directory is not directly linked from the website.This check looks for common sensitive resources like backup directories, database dumps, administration pages, temporary directories. Each one of these directories could help an attacker to learn more about his target.

Impact

This directory may expose sensitive information that could help a malicious user to prepare more advanced attacks.

Recommendation

Restrict access to this directory or remove it from the website.

ⓘ Possible sensitive files

Severity	**Low**
Reported by module	Scripting (Possible_Sensitive_Files.script)

Description

A possible sensitive file has been found. This file is not directly linked from the website. This check looks for common sensitive resources like password files, configuration files, log files, include files, statistics data, database dumps. Each one of these files could help an attacker to learn more about his target.

Impact

This file may expose sensitive information that could help a malicious user to prepare more advanced attacks.

Recommendation

Restrict access to this file or remove it from the website.

ⓘ TRACE method is enabled

Severity	**Low**
Reported by module	Scripting (Track_Trace_Server_Methods.script)

Description

HTTP TRACE method is enabled on this web server. In the presence of other cross-domain vulnerabilities in web browsers, sensitive header information could be read from any domains that support the HTTP TRACE method.

Impact

Attackers may abuse HTTP TRACE functionality to gain access to information in HTTP headers such as cookies and authentication data.

Recommendation

Disable TRACE Method on the web server.

ⓘ Broken links

Severity	**Informational**
Reported by module	Crawler

Description

A broken link refers to any link that should take you to a document, image or webpage, that actually results in an error. This page was linked from the website but it is inaccessible.

Impact

Problems navigating the site.

Recommendation

Remove the links to this file or make it accessible.

ⓘ Content type is not specified

Severity	**Informational**
Reported by module	Crawler

Description

This page does not set a Content-Type header value. This value informs the browser what kind of data to expect. If this header is missing, the browser may incorrectly handle the data. This could lead to security problems.

Impact

None

Recommendation

Set a Content-Type header value for this page.

Affected items

/assets/js/jquery-ui-1.10.3/ui/.jshintrc
Details
This feature is not available in trial version.
Request headers
`This feature is not available in trial version.`

ⓘ Email address found

Severity	**Informational**
Reported by module	Scanner

Description

One or more email addresses have been found on this page. The majority of spam comes from email addresses harvested off the internet. The spam-bots (also known as email harvesters and email extractors) are programs that scour the internet looking for email addresses on any website they come across. Spambot programs look for strings like myname@mydomain.com and then record any addresses found.

Impact

Email addresses posted on Web sites may attract spam.

Recommendation

Check references for details on how to solve this problem.
